There was no abatement in the speculative fever today, and a very active business was transacted at both sessions of the Board. The Western shares were dealt in largely, and the excitement was more strongly displayed in these, than in other stocks, alchough the novement of the whole market seems for the time to there was again a great dead of realizing on the part of the first bayers, but the market soaks up stock like a hoge sponge, and outsiders are evidently taking a stronger interest in the movemente. There was a should check in Rock Island and Galens at the close of each call at the First Board, but bet ween the sessions, the market stiffened up again, and at the Second Board the buying was again earnest and vigorous energh to carry prices up from 1 to 1 v cent above the quotations of the morning. One of the most buoy-ant stocks of the day was Cieveland and Toledo, which, from 321, the opening price, moved up to 231 in the afternoon, with sales of 5,450 shares. Illinois Central was also very active, and sold up to 661 at the close. The English quotation for this stock, by the Arabia, is 41 P cent discount, a decline of 2 P cent. The dealwere widely distributed, and but few stocks are neglected. New-York Central and Had-River are very steady, but in the rage Western stocks have attracted less atten although the same arguments in favor seem to apply to the connections of Western reads. Harlem Old and Preferred stares were in de mand, and advene d about I & cent each, and there was a quick demand for Reading at both Boards. The business in Railway Bonds increases very much, and the supply is quite limited. To fill orders, therefore, bevere are obliged to advance materially from day to eny. The absorption of this class of securities for real investment, during the lass two or three months. has been much larger than the registered sales indicate, the private transactions, in fact, very much exceeding those at the Board. The most important advance of the day was in Michican Southern 2d Mortgages, which from 58; bid yesterday, sold at 61 to-day, and were in demand at that price. A private sale of \$30,000 was made. The Smking Funds said at 79, and in the aftersoon 791 was bid. Missouri 6e were very firm at the fret Board, and sold at 82, but were a fraction lower in the afternoon. The business of the Mining Board is beginning to increase considerably, and there were tolerably large orders to-day which could not be filled. Reckland was in demand at 27. This is one of the offshoots of the famous Minneso a mine, and the works of the Company are upon the same vein. The last accounts from the mine were very satisfactory. Toe product for the month of June is estimated at 50 thus. For lake Royale 174 was hid in the afternoon. The closing prices of stocks deals in at the regular Board were se follows: United States 58, 1874, 1017 @ 1024; Indiana State 5s. 89 a 891; Tennecece State 6s, 901 @ 901; Virginia 6s, 914 2912; North Carolina State 6s, 951; Missoun is, 812 2 814; Canton Company, 20 2204; Cam berlard Con , Pief , 122@13; Pacite Mail, 911 2912 New York Central 831 a 837; Erie Railrosd, 201 a 201; Budeon Eiver Railroad, 49; # 494; Harlem Railread, 14 wit; Harlem Rulcond Preferred, 41 841; Bearing Rational, 42 c 43; Michigan Central Ratrese 52 2 521; Michigan Southers, 17 2 171; Michigan Southern Gnaranteed 371 @371; Pans no dairoad LG 01274; Ilhuote Central Raite ad, 66; a 667; Galens and Chicago Railroad, 661 2062; Claveland and Telede Railroad 33 | 632; Chiesgo and Rock Island Bailroad 7:10731; Chicago, Barlington and Quincy

Roilread, 754 a76. The market is firm for foreign bills, but the amount of transactions is moderate. Sterling is 109] \$ 109;; France, 5 12; \$ 5.11;.

The Delaware and Raritan Canal and Camden and Amboy Railroad and Transportation Company have declared a semi-annual dividend of 6 \$ cent, payable on the 20th of July. The Resolute Fire Insurance Company has declared its first dividend to the assured, 334 P cent, for which scrip will be issued on the 25th inst. Also, a semi-annual cash dividend of 5 & cent, payable to the stockholders on demand. The Republic Insurance Company a semi-annual interest dividend of 3] & cent, payable on demand. The transfer books of the Minnesota Mining Company will be closed on the 25th inst., for the payment of the dividend of \$6 & share, which will take place on the 1st of August. The Bank for Savings will pay its semi-annual interest on the 16th inst., at the rate of 5 \$ cent & annum, on all sums less than \$500, and at the rate of 4 \$\psi\$ cant on larger sums. The Bowery Savings Bank will pay its neual eemi-annual interest on the 16th inst , at the rate of 5 w cent w annum on sums of \$500 and under, and at the rate of 4 & cent on larger sums. The Equitable Life Assurance Society has declared a dividend o 31 & cent, payable July 16. The Continental Insurance Company has declared a scrip dividend of 45 @ cent to its customers; also, a half-yearly cash dividend of 7 & cent. The business of the Clearing House today was \$24,000,467. In money there is no change to notice of importance, but rates of interest continue to work easier for the borrower, and the market on call ip now where it was before the flurry on the first of the month. Demand loans are 5 06 \$ cent, and giltedged paper 5@7 & cent, according to maturity.

The Erie Railroad is to be sold on the 20th Novemher, under foreclosure of the fif h mortgage and in consopance with the arrangement for reorganization. In the meantime the Directors will make an effort to extend or pay the second mortgage bonds. Stockolders and handholders who have not assented to the scheme of reorganization have the privilege of six months after the day of sale to give such assent.

Totalitate . A alacalase.		LONG THE CONTRACTOR

The annual report of the Cleveland and Toledo Railroad Co., of which we have already given the figures in a condensed form, develops a very hopeful and progressive condition, both in a financial and business point of view. The net earnings of the year, after payment of running expenses, were \$465,534 85, and after payment of \$389,420 93 for interest, profit and loss, and extraordinary expenses, the net balance was \$76,-108 92. The most satisfactory part of this statement is that nearly the whole amount of this balance was earned in the last six months of the year. The disbursement for interest and extraordinary expenses excerds its natural amount, according to our calcalations, the sum of about \$64,000, and but for this extraordinary charge the result of the year's business

ould have been about as followed	
Net earnings	\$465,584 15
Bonded	. #35,494 20 2,960 81 289,860 C0

Goods market for the past few weeks has been broken in upon, and we are happy to record more activity. Already the large distributiog-houses of the South and West have been in our market, and those jobbers engaged in the early Southern trade have made considerable purchases during the week. The assortments in this market are full and complete, without an accumulated stock pressing on the market. A review of the business in Domestic Cotton Goods for the past six months presents results of the most satisfactory character, whether in the department of distribution or that of manufacture. The merchants of the interior, as well as the larger distributors, have confined their purchases to immediate requirements, without those speculative characteristics which prevail in some seasons, and have adhered to the cash or short time system inaugurated after the revulsion. This has en-abled the country merchants to do a profitable business, and has made the jobbers, as a class, strong, and able at all times to anticipate, if necessary, their bills payable, which at present is the rule rather than the exception. The gradual revival in the varied departments of our home trade has given such increased demand for our manufactured goods that the production has to a great extent been entered for consumption direct from the looms, leaving no surplus, which usually attends this period of the year. Our export trade has also contributed its prominent share toward this result, reaching the important aggregate of 87,260 packages since January. We do not apprehend any important increase in that department at present, as those new fields of commerce have not been fully developed, and it will be years before we shall realize the benefits to be derived from the commercial treaties arranged within the last two years. The trade with the South American Continent has been quite important, notwithstanding the monopoly which the British manufacturer holds, by those fasilities of communication on the Cousts established by their Government, either by subsidy or otherwise received we are led to believe that it will continue to increase until it shall reach a position of the greatest moment to the manufacturing interest of the country. The Woolen manufacturing interests however, during the past six menths, have proved unsatisfactory from a combination of causes, to which we have had occasion often to allude. The excessive importation, the high price of wool without a corresponding advance in manufactured goods have discon aged many fabricante, and no new enterprises are thought of. We alluded, in a previous review, to the increase of Cotton spindles during the past year. We are enabled to present a

The North Star brings \$1,514,000 in gold, which will supply the foreign drain. The news is not very important. The Supreme Court of California has decided that the State shall recognize what are known as the "Stolen Bonds." The Court rendered the decision on the 5th of June. This suit was instituted for the recovery of some \$24,000 of bonds issued to Wells, Fargo & Co., as agents for pa ties here, which bonds were issued upon scrip alleged to have been stolen from the State Treasurer's office, after baving been once paid, but not canceled. The said warrants appear to have had no receipt or indorsement showing them to have been paid, and the Court says: "The Treasurer, who is admitted to have been a vigilant and faithful officer, seems to have been equally deceived in regard to the matter as the defendants themselves." The Shipping

List says:

The requirement for money for the ensuing steamer is not very pressing, yet there is a fair demand, with about enough capital offering to meet it. The rates are unchanged 2 W cent W mounts being the oniform figure on merchandiac coll iteral or good names. Gold Bars are in good supply at present, and it is probable there will be q ite a sufficiency. The demand for China he been fair throughout the fortuight yet the dealers have been embled to he pup the it supplies well, and are now prepared to next the steamer's wants at the current rates of the fortuight, STORING for per.

There have been no Mexican dollars on sale until to-day. The Catslina's consignment a 15,00 is offered, but we understand has not been closed out being held at an advance on last quoted rates. We quote at \$12,00 is offered, but we understand has not been closed out being held at an advance on last quoted rates. We quote at \$1229 fe cent premium.

The exports of freasure from the 1st inst. to date

Falling off this year \$2,836,252 43 The appeare in The Cincinnati

Gazette:

Indianapolis and Cincinnat; Railroad, president's Office, Cincinnati, July 2.

Eds. Gazette: My attention has been called to a notice in The Law Bulletin of July 6, of a suit brought by the T votes of the Chio Lie Husurance and Trust Company against the Indianapolis and Ci cinnati Railroad Campany upon a claim

the Indiffrapolis and Circinnati Rathread Company upon of \$15.043.26.

The amount stated in The Bulletin Is an error. The claim set up by the Trustee is about \$26.00.

I have only to add that the Indian-polis and Cincinnati Railroad Company is rol indebted to the who Life is arrance and Thost Company to the amount of one dollar; and this fact should have been well known to the Trustee of that corporation when this suit was commenced.

Respectfully.

11. C. LORD, President.

The suit referred to in the above communication is hased, we suppose upon some of the bigus entres made by Ladlow, during the latter day of the Irrat

Company, to keep up appearances. If the Trustee proposes to undertake to collect such accounts as these, he will have his hands full. The Indianapolis and Cincinnati Company have documentary evidence that will explode the claim set up in this case."

The steamer Iron City, arrived at Cleveland on the 16th intt., brought down 200 tuns copper from Chiff Mine, 90 tuns from National, 18 tuns from Adventure, and 3 cuns from Az ec Mine.

LAW INTELLIGENCE.

COURT OF COMMON PLEAS—SPECIAL TERM—JULY 12.

Before Judge Brady.

THE FOWLER DIVORCE CASE.

ENEX Fowler act Wm. Fowler.

It will be remembered that a few months ago the plaintiff brought a suit for divorce against her husband on the ground of adultery. After the testimony was in the Judge decided that the question of adultery could not be submitted to the Jury if there was evidence that the plaintiff had condoned with her husband subsequent to his durinquencies. The Jury, therefore, rendered a verdit for the husband. The plaintiff appealed from the verdict of the Jury to the General Term, where the case is still pending. In the mean time she applied for allmouy on the ground that her husband was scandalizing her, and thus preventing her raming a livelihood. She further set up that her husband was a wealthy builder, and able to support her.

She also applied for counted fees to proceed with the soit.

The husband emise that h-deprived his wife of the means of getting a livelihood. He alleged text she was a dressmaker, and able to cam \$6 per week, and that his resources were limited.

The Judge this morning delivered the following opinion on the meth. E.

The Judge this morning delivered the following opinion on the meth n:

BRADY, J.—The application for alimony must be dismissed. The trial having resulted in favor of defendant, must be regarded as pacing him in a better position than he was when the former application for alimony (before the trial) was made and refused. It episatiff, however, having a pepard a case, with the intention of having the rulings of the Judges on the trial reviewed it seems to be proper to aliow a comes fee to enable the plaintiff to accompth that object. If the decreme of condomation be not applicable to this case under the circumstances disclosed, then there was evidence cannot be submit the alleged adultery to the Jury as a question of fact to be determined by them, the circum stances of this case, however, are pecular, and are such in my judgment, as will warrant an order directing the defendant to pay a reasonable counsel fee, and such an order will be unde. The defendant must, therefore, within 60 days, pay \$50 to enable the plaintiff to carry this action to a final determination.

DECISIONS.

the plaintiff to carry this action to a final de-ermination.

DECISIONS.

Bad ger agt. Benedict.—Judgment for plaintiff.

FROM ARIZONA.

THE GOLD MINES-THE INDIAN SCOUT-PROVI-SIONAL GOVERNMENT-PIMOS INDIANS,

From Our Own Correspondent. Tecsos, June 23, 1860. The excitement in reference to the gold mines near the Rio Minbres continues intense. Large parties have left Tucson, Fort Buchanan, and other places in this section of Arizona within a few days, and others are preparing to leave, although the reports from the mines are still unsatisfactory and conflicting. The extent of the gold field, so far as prospected, is only about four miles square, and unless subsequent explorations result in the discovery of new places, there will be more miners than can be employed profitably. Letters have

miners than can be employed profitably. Letters have been received here from trustworthy persons, which state that there is a great scarcity of water for mining purposes, but that the diggings, so far as prospected, are rich, yielding from \$8.50 to \$16 to the man perday. Provisions and tools are scarce, but supplies are daily expected. Two herds of cattle, and several wagons freighted with provisions have left this place for the mines, and abundant supplies from the Rio Grande are en route. The rainy season, which should set in within a few days, is looked for anxiously by the miners, as it is then thought there will be plenty of water for some months. Rains are more 'requent in that section than here, and, by the timely construction of reservoirs, the miners can secure a supply that will last some time beyond the duration of the rainy season. It wou'd be the high of foily for persons at a dictance to start for these mines a present. If rich and extensive, like the gold of Cahiornia, the field for enterprise will remain open for several years, and your correspondent, who expects to visit the mines in a stort time, will form hyour readers with accarate and reliable resorts till which time it is desirable that the

respondent, who expects to visit an exercise and relitime, will furnith your readers with accurate and reliable reports, till which time it is desirable that they wait patiently.

Capt. Ewell returned several days since from a scoat into the Indian country, at the head of forty diagons. He traced several of the more recent robberies to the Chiricabri Indians at Apache Pass, and four animals of the lot taken from the Santa Rita Silver-Mining Company some weeks since were identified and recovered. The Captain has made a demand upon the chief for the return of all the stock solen by the tribe, and he will meet him at Apache Pass on the 22ta inst, to receive the property. If the Indians fail to appear, a campaign will immediately be commenced against them.

The great excitement existing in regard to the gold mines is likely to put a quietus for the present to our Provisional Government. Officers—civil, military, and executive—alike have the fever, and are off for the mines, while the machinery of Government stops for want of proper engineers. Our only Territorial paper, The Arizonian, suspended with last week's issues, 220 we are in a fair way of relapsing into the civilization of the Dark Ages, when "might, not right," was the law of the land, and printing was among the undiscovered arts.

ered arts.
St. John's Day will be celebrated here to-morrow with the usual ceremonies of the Mexican populace, with whom the Saint is one of their patrons. Autonia, head Chief of the Pimos Indians, has arrived, with a

with whom the Saint is one of their patrons. Autonia, head Chief of the Pimos Indians, has arrived, with a retinue of some dozen men, to participate in the feedivities of the occasion. They are not Christians, that I am aware of, but aside from the religious ceremonies of the day, it is celebrated here much as we observe Christians at home. The Pimos, as your readers are probably aware are a semi-civilized cribe, occupying a reservation on the Gila River, which they catavate with great success. Their neighbors, the Marisopas, occupy lands adjoining, and the relations of the two tribes are very friendly. An intelligent traveler thus describe a their lands:

The Reservation of the Pimos and Marisopa Indians occuples the center of a plain (through with 1 mms mo Ri 1016), extending fr m the mountains bordering the Salons southward to the Playago villages, embracing a distance of high to swortly fremiles; but in according the river, this valley rapidly marrows down. Such portions as are sleaded beyond the reach of irrigation are unit for cultivation; but the Reservation tirely is easily all available for this purpose, and of wonde falferthiay. An imperiod cultivation and a succession of cops for a century and a half (tits not known how much longer) have failed to annount the soil, which hyst produces bount fully. These Indians are prevaint form of the Apachea upon whom they not unfrequently marrows occasion to retailine for unlesings to k. They are for indiang indictious, produce their own cotton, with which they marfacture their own blacksts and rise their own toots and to space. A large amount of excellent goods and an icentural implements were purchase of other Apachea, upon whom they not unfrequently implements were purchase of states and rise their own toots and to space.

Our formers are experiencing great difficulty in processing hands to harvest their ripened great, the gold

cording to appropriations of Congress for the purpose.

Our farmers are experiencing great difficulty in procuring hands to harvest their ripened grain, the gold
nites having drawn off such large numbers of men,
that is borers caunot be found. Flur is now selling
here at \$15 per handred, and the price of other prosions has advanced in proportion, owing to the shipments to the mines. Animals are also selling at high
prices, and money continues so scarce that many caunot raise the means necessary to procure an outfit for
the mines.

COMMENCEMENT AT HAVERFORD COLLEGE, PA .-The Commencement at this College took place on the lith in-t. The degree of B. A. was conf-red apon twelve young gentlem-n, and that of M. A., in cours-, upon three. The h n rary degree of M star of Arts was conferred upon John G. W ittier. The gradualing class is one of marked a lility, a d their exercises at Commencement were bigh-toned in thought, and eloquent in expression. Am ng the performances was an el-gant Latin Ode, "Ad Italiam Resurgentem," in

the Horatian stanza. THE THIBUNE IN PHILADELPHIA...W. B. ZIEBER, No. 198 South Third street, is our Agent in PHILADELPHIA, and subscribers can have Ten Tainung promptly served by carriers in almost il parts of the city.
